FAMILY PROTECTION/PRESERVATION BUREAU

FSSA's Family Protection and Preservation Bureau (FPPB) and The Division of Family and Children local offices serve all children in the state who are at risk of abuse or neglect. The FPPB administers programs that provide the following services: Child Welfare, Child Abuse Prevention, Family Services, Foster Care, Adoptions, Independent Living, Residential & Child Care Licensing, Social Services Block Grant, Domestic Violence Prevention/Treatment, Youth Services and Healthy Families.

Child Welfare is administered through case management. Family Case Manager 2s provide Child Protection Services, Services to a Child in Need of Services (CHINS), Reunification Services, and Special Needs Adoption Program services. Family Case Manager 3s provide services in cases of a Service Referral Agreement, an Informal Adjustment, Independent Living, child care home licensing, custody and adoption home studies and services, and other services utilizing federal funding for children.

Child Protection Services (CPS) protects Indiana's children from further abuse or neglect and acts or serves to prevent, remedy, or assist in solving problems that may result in neglect, abuse, exploitation, or delinquency of children. CPS must be able to receive and initiate investigations of abuse reports on a 24-hour basis. Although reports can be made in person or by correspondence, the vast majority of child abuse and neglect reports are made by telephone. CPS operates a toll free hotline (1-800-800-5556) for receipt of statewide reports.

Investigations of abuse or neglect may be substantiated or unsubstantiated. The child's safety is the primary factor in CPS investigations. Families receive further services based on the severity of the abuse or neglect, an assessment of the child's and the family's need, and an assessment of the relative safety and risk to the child in the home.

During SFY1999, a new child fatality review process was instituted to improve information gathering and prevention strategies in the area of child fatalities due to abuse and neglect. A state team reviews detailed information regarding each death involving substantiated abuse and neglect and shares aggregated information with partners, including Prevent Child Abuse (PCA) Indiana, to develop prevention strategies. The Division also contracted with PCA Indiana to coordinate a Child Fatality Review Task Force involving a wide variety of concerned professionals, from coroners to law enforcement, to make recommendations to the Division regarding local fatality review processes.

The Institutional Child Protection Services Program serves children who allegedly have been abused or neglected in any institutional or out-of-home care. Reports are received via a statewide hotline, and investigations of abuse are initiated within 24 hours. This program determines whether the child should remain at the facility or home, whether adequate protection can be provided, whether referrals are needed for follow-up monitoring, and whether referral for prosecution of perpetrators is indicated (substantiated cases).

The Family Preservation Program carries out the Division's goals to prevent unnecessary separation of children from their families by identifying family problems and assisting families in resolving them. The Division also seeks to return children who have been removed from their own homes to their families through the provision of services to the child and family.

The Family Preservation program provides services to prevent out-of-home placement, or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Services offered to families include parent education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services and home-based family services.

The program carries out these goals by providing four (4) basic services: Services Referral Agreements, Informal Adjustments, Services to a Child in Need of Services (CHINS) and Reunification Services.

Services Referral Agreements are voluntary agreements made by the family case manager, parent(s), and other involved parties when a family admits to a problem, the child is not at serious risk in the home, and no court involvement is sought.

Informal Adjustments are agreements made by the family case manager, the child's parent(s), guardian, custodian, attorney and other involved parties when a family admits to a problem and the child is at minimal risk in the home. The agreement is filed with the juvenile court, must be approved by the court, and may include many of the above-noted services.

Services to CHINS who are made wards of the court include case planning and periodic case review as well as many of the other services mentioned.

Reunification Services are provided to families when a child who has been removed from the family has a goal to return to the family. Any or all of the above-noted services may be offered.

Approximately 12,500 children and their families are being actively served at any given time. The state of Indiana has developed a five-(5) year plan for family preservation and support services with the help of local Step Ahead councils and local service needs assessments. The five-(5) year plan is funded by federal Title IVB Part II monies in the amount of \$3,951,310 for federal fiscal year 1999.

The Foster Care Program provides 24-hour care to children who can no longer safely remain in their homes due to the occurrence or risk of abuse or neglect, or due to their own need for care and treatment for behaviors which constitute a danger to themselves or others. State policy is to place children in the least restrictive, most family-like setting which meets the child's needs. Placements are to be in close proximity to the child's family, particularly when reunification with the family is the case plan goal. Placement may be made in an approved relative home, a licensed foster home, a group home or child-caring institution, or other court-approved facility. Foster parents and other care providers are involved in case planning and the provision of services to the child and the child's family utilizing a team approach with the child's caseworker.

The Title IV-E Foster Care Program provides federal funds for foster care or residential care per diem payments and for medical services for children whose families were receiving TANF on their behalf, or who would have been eligible had they applied, at the time the court ordered them removed from their homes.

The Adoption Program serves children who are legally available for adoptive placement and who are in need of placement with a permanent family. The State Adoption Program includes recruitment activities and services to the prospective adoptive family, as well as financial support and services to the family receiving the child.

The Special Needs Adoption Program (SNAP) was implemented in 1990 and employs ten regional adoption casework specialists to recruit adoptive families, as well as work with children and families in order to facilitate the adoptive placement of children who have special needs. The adoption program also works in partnership with the Indiana One Church, One Child Program, Inc.; the Children's Bureau of Indianapolis, Inc.; the Villages of Indiana, Inc.; Children are the Future, and Indiana Youth Advocate Program to recruit adoptive families for children featured in the "My Forever Family" picture book and provide adoption services to these families.. Also, the Children's Bureau of Indianapolis coordinates the publication of the "My Forever Family" picture book, Internet site, adoption hotline, and media contacts to promote the adoption program. The "My Forever Family" recruitment campaign reported 4,076 inquiries about adoption and the children featured in the "My Forever Family" picture book. As a result of the work done by the SNAP and its partners, a record number (954) of children were placed during the last calendar year (1998).

Financial assistance is also offered to families who adopt eligible special needs children. This assistance includes the Non-Recurring Adoption Expenses Program, the Federal Adoption Assistance Program, and the state adoption subsidy program. The Non-Recurring Adoption Expenses Program provides funds to reimburse the adoptive parent for one-time expenses incurred in legally adopting a special needs child. The Federal Adoption Assistance Program provides financial assistance to families who adopt IV-E eligible children, and provides financial assistance to families who adopt children with special needs and demonstrate to the court that per diem and/or medical assistance is needed in order to meet the adopted child's needs.

The Indiana Adoption History Program was established as a result of enabling legislation passed in 1993. The purpose of this program is to assist persons seeking information regarding adoptive situations to which they were a party. The Indiana State Department of Health (ISDH) is responsible for administering the program, but the county DFC offices play a major role in assisting persons to obtain information not available through ISDH. Parties to an adoption may obtain non-identifying information from the county offices without a court order if it is available. However, no identifying information may be released by a county office without obtaining permission from ISDH to do so, since certain signatures must be on file there before identifying information can be released.

The Interstate Compact on the Placement of Children is designed to protect the interests and safety of all children who are being placed in out-of-home care or for adoption across state lines and national boundaries. This compact provides a mechanism for the approval of the placement of children into relative, foster, or adoptive homes or into residential facilities and for on-going monitoring of the child's progress in these out-of-state placements.

The Title IV-E Independent Living Program provides the state with funding to purchase direct services for all youth (ages 16-20) living in foster or residential care who are in need of independent living skills. Services are planned and purchased by the Child Welfare Executive Committee in each region and through a competitive negotiation process with licensed child-caring institutions for this program. Services that are purchased through this program include counseling and support groups, vocational training, daily living skills and job search skills.

The Residential Licensing Sections of the Bureau have licensing authority for a number of facilities and homes. The primary purpose of licensing of foster family homes is to minimize the risk to children in out-of-home care by monitoring and enforcing compliance to minimum health, safety, and program standards as established in 470 IAC 3-1. Local Offices of Family and Children and licensed child-placing agencies have the responsibility and the authority to assess compliance with these standards and to submit licensing recommendations to the Bureau of Family Protection and Preservation.

Also, the section collaborates with the State Fire Marshal's Office, the State Department of Health, and the office of the State Building Commissioner. These cooperative efforts ensure that minimal standards of fire and building safety and public health protection are maintained for children in child (day) care centers and homes.

The Section also issues licenses to residential child caring institutions and group homes. Child caring institutions are agencies which provide 24-hour residential care for dependent, neglected, abused, delinquent, or troubled children who are unattended by a parent, guardian, or custodian. The minimum standards for child caring institutions servicing 11 or more children are found in 470 IAC 3-11 and 470 IAC 3-12. The minimum standards for group homes (agencies serving ten or fewer children) are found in 470 IAC 3-14 and 470 IAC 3-15. The Bureau also has authority to license private secure facilities. The minimum standards for private secure facilities are found in IAC 470 3-13.

The Division of Family and Children, in conjunction with State Fire Marshal inspectors, monitors and reviews compliances to these standards at least annually in an effort to maximize the health, safety, and well-being of children placed in these residential treatment programs.

Division staff additionally issue licenses to child-placing agencies. Child-placing agencies are authorized to recruit foster parents and to make foster family home licensing recommendations to the Division of Family and Children, to complete adoptive home studies, and to place children in either foster homes or adoptive homes. Some child-placing agencies provide only foster care services while others provide both foster care and adoption services including therapeutic foster care and international adoptions.

Contracts and Grants are administered through the Bureau, and responsibilities for the ten funding sources are contracted out to private agencies throughout the state for the provision of direct services. The federal funding sources are:

- Social Services Block Grant
- Community-Based Family Resource and Support Grant
- Preventive Health Block Grant (Sex Offense Services)
- Family Violence Prevention and Treatment Grant

The state funding sources are:

- Domestic Violence Prevention and Treatment Fund
- Project Safe Place
- Youth Service Bureau Fund
- Children's Trust Fund (license plate sales and other donations)

These funds are allocated on a competitive basis to agencies providing services in these categories:

- Domestic Violence Prevention and Treatment Fund
- Family Planning, Youth Services, Child Abuse Prevention, Families and Children Services and Sexual Offense Services

The purpose of these services is to prevent or remedy abuse or exploitation of children and adults unable to protect their own interests; to promote positive youth development; or to preserve, rehabilitate, or reunify families.

Healthy Families Indiana (HFI) Project: The Family and Social Services Administration launched the Healthy Families Indiana (HFI) Project in 91 counties during 1994-1998. The project helps to identify families at risk and offers them the opportunity to participate in a home visitor program. The program approach is designed to improve family coping skills and functioning, promote positive parenting skills and parent-child interaction, promote optimal child development, and, as a result, prevent child abuse. public/private initiative is a collaborative project designed by the Family and Social Services Administration, the Indiana State Department of Health and the Indiana Chapter for the Prevention of Child Abuse. The Healthy Families Indiana Fund blends federal funds from the following sources: Federal Substance Abuse Prevention and Treatment Block Grant, Sexual Offense Prevention, Criminal Justice Institute Juvenile Delinquent Prevention funds, Maternal and Child Health Block Grant, Community Based Family Resource and Support Grant, Title IV-B-Part 2 - Family Support and Preservation, Social Services Block Grant (SSBG), Family and Social Services Administration/Criminal Justice Institute partnership, Temporary Assistance for Needy Families (TANF) and Maintenance of Effort (MOE) funds. Fiscal year 1999 funding totaled \$12.7 million.

Indiana has the first Healthy Families program to support a state system with blended federal funds through the establishment of a Healthy Families Fund. Indiana is also the first state to establish formal linkages with the Justice Department. An evaluation of the Healthy Families Indiana program showed that 96.1% of HFI children had medical services; 99.1% had no reported child abuse or neglect; and 72.7% of parents were either employed, in school, or in job training programs. The evaluation covered 1,106 families. Only ten families had substantiated reports of child abuse or neglect.

COMPETENCY-BASED TRAINING (CBT)

Competency-Based Training is a systematic approach to providing the knowledge and skills necessary to perform assigned duties. It is a comprehensive in-service program designed to provide high quality, culturally responsive, family centered and job related training to all child welfare staff in Indiana.

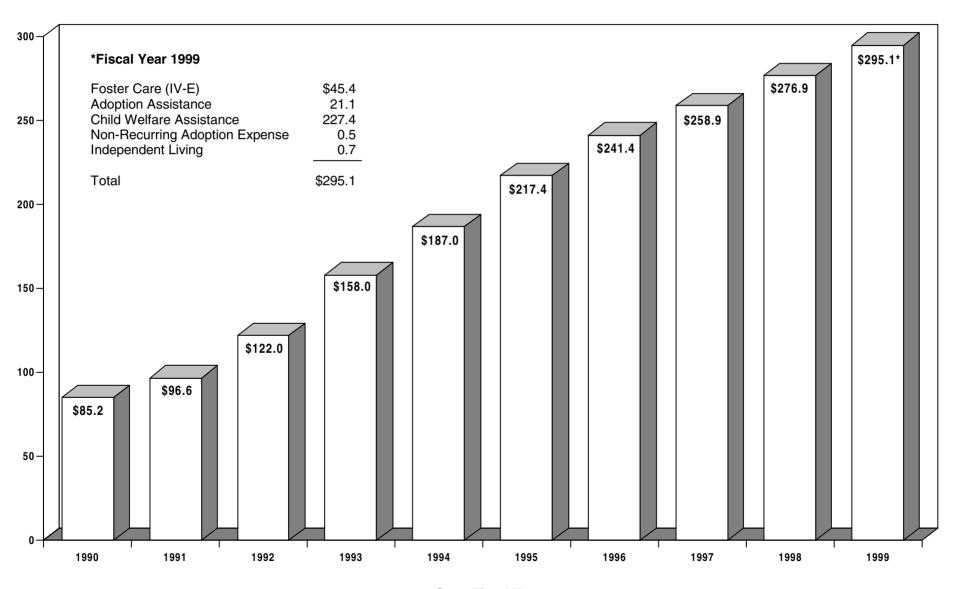

CBT provides specialized related courses as determined by workers completing Individual Training Needs Assessment (ITNA). Analysis of ITNAs completed in 1998 indicated sexual abuse training as a high priority. Sexual abuse investigation, treatment, and supervision workshops for Family Case Managers and Supervisors was offered through the CBT program to meet the high priority need.

Please Note:

The Indiana Child Welfare Information System (ICWIS) includes institutional investigations in all abuse and neglect tables and charts for Fiscal year 1999. Also children can be counted in more than one Investigation status for the same incidence report of abuse or neglect. For example a child can be counted simultaneously as substantiated sexual abuse and substantiated neglect.
